

Strategic Plan

Our strategic plan focuses on protecting and growing Helping Hand - our people, services, finances, and operations.

We are a nonprofit that offers transformative, top-tier programs and services to over 800 children and adults with intellectual and developmental disabilities.

Our mission is transforming lives of all connected to HH through genuine care and education.

Our vision is for people with intellectual and developmental disabilities to be equally valued in all communities.

What will we look like in three years?

Helping Hand will have grown to over \$30M through traditional expansion or strategic acquisition by being recognized in an expanded community footprint for the best team members in the field providing advanced genuine care and education for adult and children with I/DD

How do we get there?

Programs & Services	Community Living (CILA)	Community Day Services	HH School	Outpatient Programs	Employment Services

Transformative People

HH will expand its philosophy to be the best place to work and volunteer among Illinois I/DD service organizations for team members, volunteers, and board members.

Leaders in Exceptional Programs & Services

HH will protect and grow the spectrum of services while transforming the I/DD service model through innovation and Helping Hand's genuine care and education to serve more people and maximize student/client self-reliance.

Sustainable Growth

HH will increase sustainable income streams to reach \$25-\$30 million operating dollars to support Helping Hand's philosophy of high-quality programs and optimize infrastructure & administration.

Community Connections

HH will work to make current and targeted stakeholders aware that HH are experts in the field and provide premier services in order to hire highly qualified team members, recruit donors/volunteers, and disrupt the current I/DD culture at large to recognize that people with I/DD have equal value
